

Yusuf CEYLAN

Software Developer

As a successful software developer, I aim to leverage my hunger for continuous improvement and staying abreast of innovations to effectively work in a team environment. I aspire to work in a position where I can utilize my experiences and skills to generate creative solutions while adapting to technological advancements. The programming languages and technologies I am proficient in include C#, ASP.NET Core MVC, Web service (RESTful multi-tier architecture), HTML, CSS, JavaScript, MS-SQL, MySQL, Oracle, and Oracle BI.

Education

2014-2018

Master of Degree

Anadolu University/Industrial Eng.

2011-2014

Bachelor of Degree

Afyon Kocatepe University/Statistic

2009-2011

Associate Degree

Anadolu University/Computer Programming

Skills

- ASP.NET Core MVC, C#
- MS-SQL, Oracle, Oracle BI
- Xamarin (Mobile App)
- RestAPI, WebAPI
- HTML, Css, Bootstrap
- TFS, Github

Language

English

Experience

2022 - Currently

ESGAZ

Software Developer

Since joining this company, I have embraced a culture of teamwork. We use Jira for task tracking, following the Agile methodology. Additionally, we utilize TFS for team collaboration. I ensure to complete assigned tasks within designated timelines and provide updates on their status during daily, weekly, and bi-weekly meetings. My responsibilities encompass enhancing existing software, delivering new projects within set deadlines, providing support for web API services to banks (using SOAP), creating and modifying reports in Oracle BI, and more. Furthermore, I developed a file transfer application with LDAP authentication, feeding a multi-layered RESTful API based on ASP.NET Core MVC for a new project. I also participated in a mobile application project for the HR department, utilizing Xamarin and establishing the required functionalities through the REST API I developed. These experiences have enhanced my teamwork skills, enabled me to effectively manage projects and workflows, and empowered me to generate innovative solutions using various technologies.

2014 - 2022

Rotafilo

IT Specialist

Within the company, I had the responsibility of providing support in both hardware and software domains. On the hardware side, I conducted maintenance and support operations for systems such as the company's network infrastructure, security cameras, and servers. In terms of software, I was responsible for the development of various applications used internally within the company. I developed these software applications myself. Among the software still utilized by the company are a C# and SQL-based desktop program for tracking annual leave for the HR department, a C# and SQL-based desktop program that digitized the tracking of Regulatory Preventive Activities (DÖF) for the Quality Unit, eliminating paper usage, an Excel Macro and MS Access-based program for handling internal requests, procurement, and asset management, and a C# and SQL-based program for product shipment and project management for the Planning Unit. Additionally, I played an active role in a SAP B1 project within the company. I participated in all stages of the project, including training sessions, and served as the technical lead. Throughout this period, I contributed to the successful implementation of the SAP B1 project.

These experiences have allowed me to contribute to more efficient and effective operations of the company in both hardware and software domains, resulting in improved productivity.
